(1)

The file relating to the appointment of the Pathologist is being dealt with separately. In that file, we are addressing the Government of India to sanction the continuance of the Pathologist's appointment on a permanent measure from 1-4-35.

Provision for the appointment of a Bio-Chemical Assistant on a pay of Rs.45-8/2-85 has been included in the budget for 1935-36; but as the Residency Surgeon wants the Assistant to be entertained immediately, his proposal to sanction the post, temporarily for the present, for 4 months from 1-11-34 to 28-2-1935, may be approved. He says that he can meet the expenditure (Rs.180/- @ Rs.45/- per mensem for 4 months) from savings under "A-2 Pay of Establishments".

If the provision made in the budget for 1935-36 is approved by the Government of India, the sanction can be continued during 1935-36.

Please see paras 19 to 35 of notes in file No,218/31 regarding the creation of the post of a Stenographer in the Residency Surgeon's Office on a pay of Rs.35-3-80-4-100, plus a special pay of Rs.25/- or Rs.15/- according to the qualifications of the Stenographer. Mr.K.S.Venkatadry, the present incumbent of the post, was in Government Service before the 15th July 1931, and is now paid Rs.47/- (scale pay) plus Rs.25/- special pay. The pay of the post may be revised as suggested by the Government of India, with effect from 1-3-1935, when the existing sanction expires.

Subject:—

SIR,

I have the honour to invite reference to my letter No.117/P-18/1-B/34 dated the 24th August 1934 giving details of the increase of work in the Laboratory of the Bowring and Lady Curzon Hospitals since the appointment of the new Pathologist.

2. In that letter I stated that the Laboratory was even yet unable fully to respond to the legitimate claims made upon it by the Institution; more especially is this the case in the recently started Bio-chemical investigations. These investigations, which are essential to the efficient practice of medical diagnosis and treatment, as a general rule consume a great deal of time and demand a considerable knowledge of chemistry, including a knowledge of volumetric analysis. As a result thereof, even matters of routine have to be performed at present by the Pathologist himself instead of, as they should be, under his supervision; & this results in their application, of necessity, being severely limited, in view of the considerable volume of work in the Bacteriological, Serological, Cytological and Parasitological sections. In existing circumstances the Laboratory

12

opens at 8 A.M. and remains open till 7-30 or 8-30 P.M. During this time the Pathologist absents himself for one hour for his meals when his Assistant is on duty; and even with these hours of work it is not possible -- fully to meet all claims, and especially Bio-chemical claims.

3. The great majority of bio-chemical investigations could be performed by an assistant with a knowledge of chemistry and volumetric analysis of the standard of the B.Sc., which would relieve the Pathologist of the troublesome details of standardisation of solutions etc., which occupy much time, and free him to attend to the interpretation of tests and to the finer investigations for which he is trained.

4. I have the honour, therefore, to request that the Hon'ble the Resident will be good enough to sanction the appointment of a Bio-chemical Assistant on a salary of Rs.45-8/2-85 (equivalent to that of the Electric Mechanic) to enable this branch of the Laboratory to be developed sufficiently to meet the claims made upon it.

I have the honour to be,

Sir,

Your most obedient servant,

Lt.-Col., I. M. S.,
Residency Surgeon.

25 AUG. 1934
Regd. No. 7895

My dear Edwards,

I have today sent in through the ordinary official channel two letters, of which No.117/P-18/1-B/34 is on the subject of the Pathologist about which I spoke to you some days' ago.

No.118/L-14/1-B/34 concerns Bio-chemistry and although, perhaps, it is out of place in official correspondence, it may be permissible to cite in Demi-Official one out of very many instances of the results of the introduction of this type of work in these hospitals.-

A retired British Officer had for 5 years been the victim of a disease of the digestive system which had completely incapacitated him. During these 5 years he had consulted many able physicians without any other but temporary relief. The condition was progressive and the patient was losing heart. Owing to the possibility of performing a fractional test meal, we were able to establish that the patient's condition was due to deficiency of acid in his gastric juice. Treatment appropriate to rectify this dificiency was successful and the patient has now been free for nearly three months and is in per-fect health.

14

This example, admittedly spectacular, as involving a person of local prominence, is but one of many which have occurred since the introduction of Clinical Bio-chemistry in these Hospitals; but it will, I think, sufficiently establish its utility.

Will you, therefore, kindly use all influence that you can to obtain the sanction of the Assistant now asked for?

Yours sincerely,

M. Nanjundaiah

SUBJECT:-
Appointment of a Bio-Chemical Assistant.

Sir,

S.N.1 Part I

I have the honour to invite a reference to my letter No.118/B-2/1-B/34., dated the 24th. August 1934 setting forth in detail the reasons necessitating the appointment of a Bio-Chemical Assistant in the Laboratory of the Bowring & Lady Curzon Hospitals.

The exigency of the present work necessitates the creation of this post earlier than anticipated and I therefore request you kindly to obtain the sanction of the Hon'ble the Resident to the entertainment of a Bio-Chemical Assistant on a salary of Rs 45-8/2-85 from 1st. November 1934 temporarily for the present upto 28th. February 1935.

The expenditure can be met from the savings under the head "Account III-Medical & Public Health-A.2-Pay of Establishment".

I have the honour to be
Sir,
Your most obedient servant

S.N.7

From-The Assistant Secretary to the Government of India
in the Foreign and Political Department,

To -The Hon'ble the Resident in Mysore.

OFFICE OF THE RESIDENT IN MYSORE, BANGALORE.
31 DEC. 1934
Regd. No. 12153
File No. 1078/34

Memorandum No.F.30(34)-E/34.
Dated New Delhi, the 24/12 December 1934.

Continuance of the temporary posts of Stenographer and Bio-Chemist in Bowring Hospital.

....

S. N. 6 B 1021-34

Reference your express letter No.F.568-34/R.O.I, dated the 17th November 1934.

2. The Government of India are of opinion that while the scale of pay for the Bio-Chemist, Viz. 45-85 is reasonable that for the stenographer which has been based on the scale of pay of other clerks in the Resident's Office, viz. Rs.35-3-80-4-100 is rather excessive. This post is of like character with those in this and the other hospitals in the station where the scale of pay for clerks is Rs.35-2-65 for existing incumbents and Rs.30-3/2-45-2/2-55 for new entrants. The post should therefore be on Rs.30-55 unless the present incumbent of the post has been in Government Service since the 15th July 1931, in which case he may be given the old scale. As regards special pay, Rs.15/- would seem to be adequate in view of the fact that the clerk who works as Stenographer to the Additional Judge in addition to his other duties gets only a special pay of Rs.15/- per mensem. In the case of new entrants the special pay might be fixed at Rs.10/- per mensem. I am accordingly to suggest for your consideration the advisability of refixing the pay and special pay of this post from the 1st March 1935 in accordance with the scale as modified above.

3.

15

3. To enable you to sanction the continuance of [redacted] post of Bio-Chemist and stenographer on these [redacted] for a further period of one year, steps have been taken to include the necessary provision in the budget estimates for 1935-36.

S. V. Brewas

Assistant Secretary to the Government of India.
